

Discussion

The South African Law Reform Commission Report on Adult Prostitution recommended the continued criminalisation of sex work which impedes on the rights of Sex workers

Sex workers continue to experience violations at the hands of police and the patterns of abuse that sex workers experience are as a result of their criminal status, which increases their vulnerability to violence as well as other forms of human rights violations. The current legal framework forces sex workers to the margins of South African society, where they are easy targets for abuse by clients, police and different structures of power. Sex workers experience different forms of stigmatisation, social exclusion, deprivation and abuse coupled with low levels of access to health care, employment, access to justice and economic advancement. These violations directly impact on their right to be equal before the law, human dignity, freedom of security of a person in particular to be free from all forms of violence, bodily autonomy, privacy (unlawful search and seizures) and freedom of trade and occupation. The panel will discuss the human rights violations of sex workers by SAPS, the right to bodily autonomy and the impact of the SALRC recommendations on the rights of sex workers.

Facilitator: Mosima Kekana

Mosima Kekana is a young diligent Attorney and activist who is currently employed at the Women's Legal Centre under the Vulnerable Workers Rights Programme. She has over seven years' experience in the legal fraternity.
